

Where is Ann Mwangi Mvurya?

There are several reasons why **Ann Mwangi Mvurya** - President of University of Nairobi Students Association, UNSA - was embedded specifically into Nairobi Governor, **Mike Sonko**:

1. Sonko cannot be accused of being clever. Seeing a beautiful, rich university student looking at him so affectionately, he must have thought, “surely, this is not about money...I must be the ultimate Kenyan *ndume*.”
2. Establishing a romantic relationship with Sonko ensured that Ms Mvurya was guaranteed use of Sonko’s thugs in her campaign to become President of University of Nairobi Students Association, UNSA.

NOTE: Mossad strategists are very, very clever.

At the university of Nairobi, Ms Mvurya presented herself as a girl from a rich family. She was driving a nice car, and most importantly, she lived outside campus.

That is a very clever tactic, because living in the university residential halls would have exposed her to inquisitive fellow students, and someone might have just discovered that her story doesn't add up.

As for Sonko, he is just too stupid to realise that his mistress was not who she said she was.

If things had gone according to plan, and Ms Mvurya was not outed, it is very possible that she could have campaigned and won a major political seat in 2022 elections, like Nairobi Women rep or even Senator.

In 2027 or 2032, she could even have become President of Kenya.

Motive

The reason that Mossad (and its financiers) have chosen this tactic is because they have found it very difficult to conquer Kenya using conventional methods.

This tactic of educating a foreigner about Kenya society, culture, language(s), is a lot of work. It must be extremely complicated. It is not easy at all to train a person in such a way that they can be deployed to another country, and be accepted as local by the natives.

Here, Mossad must be congratulated.

However, this would have been almost impossible 30 years ago. The current technology has been a blessing to Mossad, because if someone is suspicious of their agent, they (Mossad) will know about it quickly - through backdoors in social media, search engines, phones etc. - before the information spreads, and find ways to counter the nascent rumour.

Other “Ann Mwangi Mvurya”s

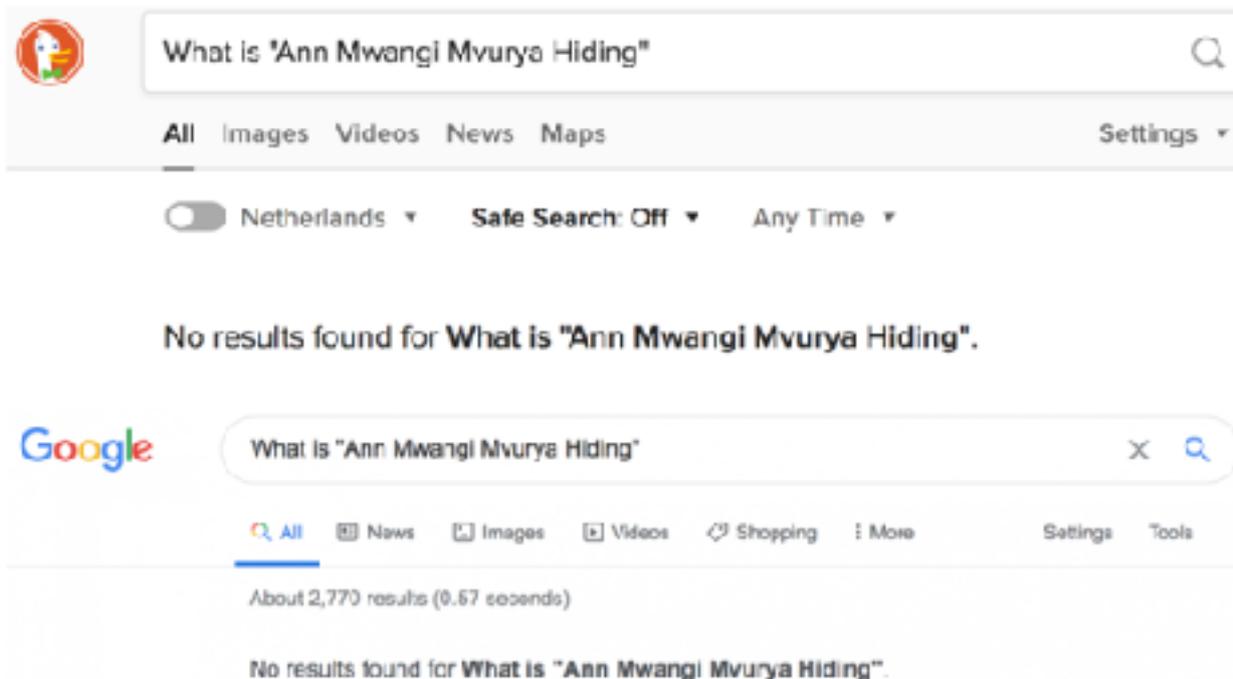

If I was to make a wild guess about how many agents Mossad has currently embedded into Kenyan society and presenting themselves as Kenyans, I would say around 50.

For instance, there is a certain senior politician that is a very likely candidate for Mossad to embed a *Mossad-Kenyan* into his life. I would guess that there is 90% probability that Mossad already have their agent embedded into this particular politician, either as a (secret) spouse, mistress, girlfriend, close friend or close business associate.

NOTE: Do not confuse *Mossad-Kenyans* with other Mossad agents in Kenya who come as businessmen, aid workers, tourists etc. *Mossad-Kenyans* are foreigners passing themselves as Kenyan natives (this means that they are also either Black/Arab-looking, or mixed-race).

Search Engines

Most recent articles about Ann Mwangi Mvurya (or Ann Mvurya Mwangi, as she sometimes calls herself) are being blocked by search engines. Who is capable of doing that? And why?

The image above shows that a recent article about Ms Mvurya is blocked by search engines, despite having many links from well-established websites. The article is from the blog linked below.
